STATEMENT OF EU REACH COMPLIANCE

AMETEK IntelliPower continues to ensure that our products are compliant with the European Union Regulation (EC) 1907/2006 governing the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) and do not contain substances above 0.1% weight of a Substance of Very High Concern (SVHC) listed in Annex XIV as of September 22, 2023.

AMETEK IntelliPower is constantly working with our supply chain in reviewing the thousands of parts which are incorporated into our product lines. This declaration is made with AMETEK Programmable Power's best effort to meet the intent of the continuous updates to REACH regulations in good faith, without liability.

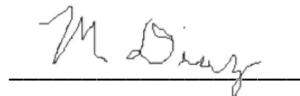

AMETEK IntelliPower is not a bulk manufacturer or exporter of chemicals that fall under the requirements of the European Union's Registration Evaluation and Authorization of Chemical Substances (REACH) regulations (EC 1907/2006).

As a manufacturer of electronic devices, AMETEK IntelliPower products are considered "articles" per the REACH legislation. As such, AMETEK IntelliPower is not required to register as a producer of "substances" or "preparations".

As part of AMETEK IntelliPower's downstream user obligations, we continue to work with our vendors as items are added to the candidate list. AMETEK IntelliPower is not currently aware of any products that contain SVHCs (Substances of Very High Concern) in excess of 0.1% weight per part at this time.

Should you have any questions regarding the content of this letter or any REACH related issues, please do not hesitate to contact AMETEK IntelliPower Quality department.

Respectfully,

Michael Diaz
Director of Quality
